## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 13, 15, 17, 31, 33, 35, 49, 51, 53, and 58 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fuller et al. (Fuller; US 4,893,335; cited and applied for the first time).

With respect to claims 1 and 58, the claimed call block assistant/communication interface reads on the disclosed control system 10 of Fuller because it teaches call screening; and claims 32, 41, and 53 of Fuller plainly teach the claimed feature of sending a false ringing indication (reads on the artificial ring-back signal) to a caller (reads on the remote user).

With respect to claims 13, 15, 17, 31, 33, 35, 49, 51, 53; refer to the call screening section of Fuller at columns 12 and 13 where the claimed caller identification reads on the calling party access code.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 18-21, 36-39, and 54-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuller as applied above.

To implement the concept already well established and well known in POTS (Plain Old Telephone Service) such as the one taught by Fuller into the Internet telephony environment (with its associated signaling protocols) would have been a matter of pure design choice and thus would have been obvious even to one of ordinary skill in the art at the time of the invention.

***Allowable Subject Matter***

6. Claims 4-12, 22-30, and 40-48 are allowed over the prior art of record.
7. Claims 2, 3, 14, 16, 32, 34, 50, and 52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
